

Vote **FOR** Kids Vote **FOR** Public Education

Vote **FOR** 1

Vote FOR putting parents in control and giving families a CHOICE

Moms and Dads know better than anyone else what works best for their child. Not all kids get what they need in their assigned public school, but those kids deserve a good education too. The law provides for a scholarship of \$500 to \$3,000 depending on income level. With over 120 private schools and average tuition of less than \$4,000, parents who need an alternative will now have a real option.

Vote FOR smaller class sizes and more funding

This school year taxpayers will spend more than \$7,500 per student in public schools. The average voucher amount is \$2,000. That means that, when a student leaves with a voucher, \$5,500 stays in the local school increasing per pupil funding and lowering class size. That savings means more than \$1 billion for public school students over thirteen years, according to Utah State University.

Vote FOR HOLDING TAXES DOWN as education costs go up

The savings from Referendum 1 means that we are more equipped to handle growth in public schools. Over the next ten years, 150,000 new students will enter school. Referendum 1 shifts some of that growth to private schools, where space already exists, and at a much lower cost. As taxpayers, we can then provide quality education to all students without raising taxes. *That is putting Utah Kids 1st!*

Vote FOR reforms that are PROVEN TO WORK

Scholarship programs like Referendum 1 exist in many states across the country. Academic studies from leading researchers (like Harvard University, The Manhattan Institute and more) prove that these programs lead to:

- more funding for public schools, and
- higher academic performance for students in all schools.

That is why Governor Huntsman signed this into law and has said he is going to Vote for 1.
